

Practical Guide to the Operation and Optimisation of Media Filters

Peter Mosse and Bruce Murray

International Centre of Excellence in
Water Resources Management

| | |
|---|----|
| Foreword: | 01 |
| Acknowledgements: | 02 |
| General Introduction: | 03 |
| Contents: | 04 |
| Chapter 1 - Hazards, Risks and Control Points: | |
| • Hazards and Water Treatment: | 07 |
| • Pathogens are the Real Hazards in Drinking Water: | 07 |
| • Other Hazards: | 10 |
| • Control Points: | 10 |
| • Critical Limits and Target Criteria: | 11 |
| • Monitoring: | 12 |
| • Responsibilities: | 12 |
| Chapter 2 - Filtration Targets: | |
| • The Importance of Filtration: | 13 |
| • The Filtration Process: | 13 |
| • Operating Criteria and Performance Parameters: | 14 |
| • Why 0.1 NTU in Filtered Water? | 15 |
| Chapter 3 - Filter Optimisation: | |
| • Establish Filter Run Times: | 16 |
| • Turbidity Breakthrough Ripening Period: | 16 |
| • Establish Filter Backwash Time: | 18 |
| • Observe Filter Operation and Backwashes Regularly: | 19 |
| • Measure Rates: | 19 |
| • Inspect the Media: | 20 |
| • Deep Bed Investigations: | 25 |
| • Keep Filter Walls and Launders Clean: | 25 |
| • Some examples of Problems with Filters: | 26 |
| • Measure Metal Concentrations in the Filtered Water: | 28 |
| • Minimise Particle Breakthrough: | 28 |
| • Minimise the Effect of Flow Rate Changes and other Hydraulic Shocks: | 29 |
| • Calibrate Differential Pressure Guages, Flow Meters and Turbidity Meters: | 30 |
| • Minimise the Filter Ripening Period: | 30 |
| • Reduce the Risks Associated with Wastewater Recycling: | 31 |
| • Optimise Chemical Dosing: | 32 |
| • Storing Filters Off Line: | 32 |

| | | |
|------------------|------------------------------|----|
| Chapter 4 | - Filter Backwashing: | 34 |
|------------------|------------------------------|----|

| | | |
|---|--------------------------------------|--|
| Chapter 5 | - Monitoring Filter Function: | |
| • Short Term Monitoring of Filter Function: SCADA Trends..... | 36 | |
| • Long Term Monitoring of Filter Function..... | 37 | |
| • Other Measures | 38 | |

| | | |
|---|--------------------------|--|
| Chapter 6 | - Fixing Filters: | |
| • Repeated Back washing | 40 | |
| • Surface Scraping | 40 | |
| • Jet Lancing | 40 | |
| • Caustic Soaking | 41 | |
| • Chlorine Treatment | 41 | |
| • Managing Media Downstream of the Filter | 42 | |
| • Topping Up Filter Media | 43 | |

| | | |
|---|------------------------|--|
| Chapter 7 | - Filter Media: | |
| • Media Sieving | 44 | |
| • Physical Properties | 46 | |
| • Filter Media Selection and Design | 48 | |
| • Filter Media Life | 49 | |

| | | |
|-----------------------------------|------------------------------|----|
| Chapter 8 | - Rebuilding Filters: | |
| • Getting Started..... | 50 | |
| • Dismantling the Filter | 51 | |
| • Rebuilding the Filter | 55 | |
| • Recommissioning the Filter..... | 56 | |
| Chapter 9 | - Closing Words | 57 |

Appendices

Appendix 1 - Calculation of Filtration Rates and Backwash Rates..... 58

Appendix 2 - WTP Filter Entry Hazard Identification and Risk Assessment:..... 60

Appendix 3 - Example Filter Entry Permit:..... 61

Appendix 4 - Equipment Requirements:..... 63

Appendix 5 - Filter Inspection and Assessment Procedure:..... 64

Appendix 6 - Filter Inspection Record Sheets

- 1. Water Quality Sheet: 68

- 2. Filter Performance Background Information Sheet: 69

- 3. Backwash Data Sheet: 72

- 4. Backwash Observation Sheet: 73
