

Waste Water Treatment Plant Operator

We are a growing Australian owned company, which services overseas and domestic customers with a highly successful range of locally manufactured, premium branded dairy products.

A 12 week vacancy currently exists for a waste water treatment operator. The plant employs aerobic digestion technology to treat dairy waste water to a standard suitable for discharge to a municipal water plant.

Roles and responsibilities include the following;

- Perform basic laboratory analysis on waste water samples
- Operate a range of automated and semi automated plant
- Liaise with maintenance when required
- Fill in quality documentation and report any issues
- Work unsupervised (at times) on a rotating shift roster
- Approx 12 week position commencing from early-mid September
- Students or recent graduates are encouraged to apply.

Burra Foods is located 20 minutes from popular Bass Coast Surf beaches and 90 minutes from the Melbourne CBD.
