

## **DRAFTER – Electrical**

- Canning Vale location
- Progressive company in growth mode
- Full time role

Hydramet is a Perth company, with offices in Adelaide and Melbourne, servicing the water utility, resources, aquatic and general industry sectors.

They are highly regarded in their sector, recognised for their innovation, quality and customer service and have an excellent team working environment.

We are seeking an electrical drafter with mechanical capabilities to support their technical team.

Reporting to the Engineering Services Manager, the position responsibilities include:

- Electrical design CAD drafter with mechanical drafting experience
- Design/preparation of switchboard general arrangement and control drawings
- Ability to read and interpret P&ID's
- Preferable (but not essential) Electrical trade background
- Ability to coordinate a project from start to finish
- Confirming scope of assignments, including costs and projected timeframes
- Generating drawings and specifications
- Assisting with the development of designs for new products and modifications to enhance product ranges
- Detail drafting for projects
- Generate Bills of Material for products and systems
- Create concept drawings
- Resolving technical queries and providing a high level of customer service

Candidates must have solid drafting/design experience (minimum 2 years), supported with trade and/or tertiary engineering or electrical drafting qualifications. Candidates with mechanical capabilities are preferred.

Skill requirements include:

- Excellent AutoCAD ability
- Good computer literacy with Microsoft suite
- Ability to read and interpret electrical and mechanical drawings
