

## **Water Treatment Plant Team Leader – Mt Crosby**

The Queensland Bulk Water Supply Authority trading as Seqwater was established by the State Government of Queensland in November 2007 to manage major catchments, dams, storages, groundwater sources and water treatment infrastructure in South East Queensland. Seqwater operates 46 water treatment plants in South East Queensland, providing Water Treatment Plant Operators with significant opportunities to expand their experience.

Based at one of the largest water treatment plants in Queensland, the Team Leader will have the opportunity to supervise operational activities across a number of Seqwater owned water treatment plants located in and near Brisbane. Mt Crosby Water Treatment Plants have a modern supervisory control system which remotely monitors water treatment processes and water quality.

The successful person will also be required to supervise resource allocations and optimising the operation of multiple water treatment plants through effective use of rostering, scheduling, assigning duties, monitoring and reviewing plant performance and resolving operations issues.

To be suitable for this position you will have; substantial relevant knowledge of the practice of current water treatment principles; high level of demonstrated experience with operation of water treatment plants and associated infrastructure; experience in supervising operations teams; and relevant qualifications appropriate to the role; for example: water industry certification, trade certification and/or relevant diploma .

To apply, submit your resume and covering letter to [employment@seqwater.com.au](mailto:employment@seqwater.com.au)

Applications close 23rd July 2010
